

## Engine Rebuild Procedures and Prices

Cannondale engine rebuild rate: \$1,100  
Head porting: \$400  
Head porting if done as part of an engine rebuild: \$300  
Surcharge for cleaning of dirty engines: \$130  
Additional services: \$65 per hour.

Engine repair procedures are as follows:

1. Upon receipt of the engine, and a \$300 deposit, the engine will be placed in line for repair (first come, first served.)
2. After the engine has been disassembled and analyzed, you will be contacted with an estimate of the total repair cost.
3. At that point, you can refuse further work. If you do, either (a) your deposit will be forfeited and the engine parts will be returned to you, or (b) you can refuse the work and forfeit the engine, in which case we will refund \$150 of your deposit.
4. If you elect to have the repair work done, you will be contacted upon completion of the repair work with a final bill (less the original \$300 deposit.)
5. Once the total payment is received by us we will return the engine to you.

### Unpaid Engine Repair Bills

Unpaid engines that are left for more than 45 days will become the property of Black Widow ATV and will be sold for repair charges. No refund of the deposit will be given on unclaimed engines.

### Surcharges

There will be a surcharge for any engine that arrives in a dirty state. A 'clean' engine will have all dirt, oil and grease removed from the outside, and all fluids drained from the inside.

### Included Services

Please note that rebuilding and balancing of the crank is included in the rebuild price. A diagnostic check of the ECU and a throttle body calibration will also be included at no additional charge if sent to us along with the engine.

These policies, procedures and pricing are effective as of 1 November, 2007.
